

THOUSANDS OF CONFORMS IN A SINGLE DAY

An intense need exists to get content to market faster as providers dig deeper into their archives to satisfy consumer demand and participate in new international OTT platform launches. AudioPress automated audio conform fills this need with fast, intelligent automation.

AudioPress

AUTOMATED

Quickly and accurately conform your content and improve the time to world wide markets.

COST EFFECTIVE

Compared to traditional processes our tool will help you monetize your entire library for less.

BORN IN THE CLOUD

Utilizing the power of AWS, synchronize any audio track to a master reference file using deep analysis and automated conformance algorithms.

COMING SECOND QUARTER 2021

An incredibly powerful tool, it will analyze the actual video of source files to determine the best processing path and create a progressive mezzanine file. No more errors stemming from incorrect source file metadata or operator mistakes.

VideoPress

AUTOMATED

Submit jobs through the VideoPress API or CSV. Process hundreds of sources concurrently with consistent and reliable results.

BROAD TOOL SET

3/2 pulldown and 4th frame repeat detection and removal, adaptive deinterlacing, speed change correction, colorimetry tagging and more. All applied automatically based on source interrogation and desired output type.

INTELLIGENT

Precision and reliability are key in video mastering. VideoPress is built by post production professionals with over fifty years of collective experience in mastering.

DEEP ANALYSIS

Based on the actual video material not file metadata. VideoPress knows what to look for, identifies it, and fixes it.

BORN IN THE CLOUD

Utilizing the power and scale of AWS for worldwide reach and incredible throughput.

BITPRESS

AUTOMATED – FAST – INTELLIGENT

Bitpress develops tools that enable rapid monetization of content by automating traditionally laborious and complicated processes. We understand the challenge and cost of manipulating media. We have a history of innovation through automation for the largest and most respected post production and media companies in the world. We've authored many patents and engineered workflows for every major studio and the largest OTT providers.
